with 56% open area

Architectural Firm | Pieper, O'Brien, Herr Architects
Alpharetta, GA

ASM Authorized Dealer | Bonitz Contracting
Charleston, SC/Atlanta, GA

General Contractor | Inglett & Stubbs
Integra Construction

Quality Metro Tech is owned by Quality Technology Services (QualityTech) which is headquartered in Suwanee, Georgia, just outside of Atlanta. QualityTech is one of the nation's largest privately held providers of data center facilities and managed services with over 2 million square feet of data center space strategically located throughout the United States. The company's roots began in 1962 by James L. Williams and in 1988, Chad Williams took the leadership role to greatly expand the company to encompass multiple business entities. QualityTech has the systems, infrastructure, and experienced staff to provide managed services for special use, mission-critical facilities, data centers, laboratories, and Class "A" office buildings.

The Atlanta facility has currently over 200,000 square feet of ASM access floor with expansion in process to exceed over 500,000 square feet of data center space. The combination of medium duty floor panels in the field and with heavy duty floor panels in critical areas and corridors, coupled with high flow aluminum air grates has set the standard for data center design and application for the future. This system will become a permanent fixture for their customers and will continue to meet their future needs in today's fast paced technology development.
